

Application No. 304: Cleaning metal tracks

Author: Hipólito Domínguez Moreno, Sevilla, Spain

Cleaning while driving - a boy's dream come true!

I like playing with scalextric (www.scalextric.com/) tracks and cars. These cars race around tracks. For a smooth ride, the tracks have to be in impeccable shape. Dust or fat makes the cars stall.

My invention: A wiping cloth is pressed against the metal tracks with a block magnet (www.supermagnete.nl/eng/Q-15-15-03-N) and a scalextric car drags it around the track. This helps freeing the tracks from dust and fat. Then, you can replace the cloth with a sized cotton ball and let the car make its rounds again. This way, you can get rid of all the dirt.
